

NARESH KUMAR C

Python Fullstack Developer

nareshkumarc2004@gmail.com | +91 9150141464 | [My Portfolio](#) | LinkedIn: [Naresh](#) | GitHub: [Naresh](#)

EDUCATION

B.E. Electronics and Communications Engineering KLN College of Engineering, Sivagangai CGPA: 7.57	2025
Higher Secondary Certificate (HSC) V.H.N. Higher Secondary School, Madurai 86.06%	2021
Secondary School Leaving Certificate (SSLC) Tagore Vidyalayam Matriculation School, Madurai 80.4%	2019

PROFESSIONAL SUMMARY

Results-driven Python Fullstack Developer with hands-on experience building scalable web applications using Django and Flask. Proficient in both SQL and NoSQL databases, RESTful API design, and end-to-end application development. Currently growing practical expertise through a professional IT Trainee role, with a strong foundation in frontend technologies and a passion for writing clean, efficient backend code.

TECHNICAL SKILLS

Frontend Development

• HTML5	• TailwindCSS
• CSS3	• JavaScript

Backend Development

• Python 3.11	• Flask
• Django 4.2	• RESTful APIs

Database & Tools

• MySQL	• Git & GitHub
• MongoDB	• VS Code

PROFESSIONAL EXPERIENCE

IT Trainee Egrove Systems	<i>April 2026 – Present</i>
- Gaining hands-on experience in fullstack web development using Python-based frameworks. - Collaborating with development teams on real-world projects involving Django, Flask, and database management. - Contributing to the design, development, and testing of web application features. - Developing skills in writing clean, maintainable code and following software development best practices.	

PROJECTS

Product Finder Web Application — *HTML, CSS, JavaScript, Flask, MongoDB*

Developed a dynamic product search and filtering application allowing users to search products by brand, price range, resolution, OS, and screen size. Implemented an interactive popup interface to display detailed product information, with real-time filtering powered by a Flask backend and MongoDB data store.

Brand Garage — Car Model Management System — *HTML, CSS, JavaScript, Flask, MongoDB, MySQL*

Built a full-featured car model management application to add, edit, and display car details including brand, model, and specifications. Designed a clean, user-friendly interface with dual-database architecture leveraging both MongoDB and MySQL for flexible data storage and retrieval.

CERTIFICATIONS

- Java Programming — SSI Education (3-Month Intensive Course)
- Python Fullstack Development — Elysium Academy Private Limited (November 2025)

ACHIEVEMENTS & ACTIVITIES

- Presented innovative technical project at a state-level competition at Velammal College of Engineering.
- Volunteered and spearheaded the National Science Day Quiz Contest, driving student engagement and scientific curiosity.

INTERESTS

- Internet of Things (IoT) — exploring sensor integration and embedded systems.
- Backend architecture, API design, and building scalable distributed systems.
